Itinerary

DAY 1 Arrive Kathmandu

Welcome to colorful Kathmandu where our friendly Ultimate Expeditions representative will meet you at the airport and drive you to your hotel. During this meet and greet your guide will discuss the daily activities of your trip.

DAY 2 Drive to Syabru Besi, (4,593 ft / 1,400 m)

Today we travel to Syabru Besi, the starting point for our trek. The long 8 hour drive offers beautiful views of the Himalayan and the regions mountain lifestyle.

We follow the Syabru Besi's main road, passing terraced fields and into the dense forest. We follow the Langtang Khola River and make several crossing on suspension bridges. The trail undulates but is not challenging.

DAY 4 Trek to Langtang Village (11,482 ft / 3,500 m)

We continue along the dense forest and the trail climbs steadily through the valley, opening up to yak pastures and scattered Tamang villages. Langtang village is the headquarters for the Langtang National Park and our resting stop for the evening.

DAY 5 Trek to Kyangjin Gompa (12,467 ft / 3,800 m)

Kyangjin Gompa is home to a monastery and cheese factory, we make our way there through yak pastures, passing a large mani wall and the villages of Muna and Singdun. We will start to notice the thinner air as we push higher in elevation.

DAY 6 Explore Kyangjin Gompa (12,467 ft / 3,800 m)

Today we will rest and acclimatize spending the day in Kyanjgin Gompa, exploring the village's cheese factory and monastery. If you are in search of snowcapped peak views hike up Kyangjin Ri (14,271 feet) and soak in the stunning scenery.

DAY 7 Trek to (9,015 ft / 2,748 m)

NEPAL

Best Time to Visit

It is possible to visit Nepal year round, but spring and autumn are the two most favorable seasons for trekking.

March, April and May (Spring)

These months are considered to be the best in terms of weather and beauty; they are also the busiest months. Days are warm with an occasional rain shower that invites an array of blooming wildflowers, displaying vibrant colors on a lush backdrop. Hikers say it's the most pleasant time to trek.

June, July and August (Monsoon)

The monsoon season brings severe rains making the certain routes impassable. Lodges and trekking operations in some areas are closed during this time, but there are options for trekking around Annapurna and Manaslu which receive significantly less precipitation than the more southerly areas.

Mid-September – November (Autumn)

The weather is dry and skies are generally clear, with mild to warm days and cold nights. Nights can easily drop to below zero freezing temperatures.

November – February (Winter)

Generally dry with daytime temperatures cooler and very cold nights. The days are typically clear with occasional winter storms. Trekking during this mid-winter season can be more challenging in the high altitudes.
